New York, May 4.—Commercial Advertiser's London financial cablegram: The market's here opened weak the capture of Brandfort being disregarded. There was a heavy break in home rails on the announcement that coal contracts had been raised 5 shillings a ton, or 50 per cent. The close was more cheerful on the better view of the money situation. Americans were absolutely stagnant throughout the session and the street was silent.

Paris neglected Tintos, but Anacondas were hard in response to New York's price. The bank bought £11,000,000 in German coin.

Call money was less wanted and the bank received back the moderate sum due and did a small business on discounts. Bills were steady, but idle.

Silver, spot, was tirmer on small eastern demand.

Forward rates were unchanged, New York appearing inclined to sell.

and liabilities were the smallest re ported in any single month for at least seven years past. Liabilities showed even a larger shrinkage from the preceding month of March than did failures themselves, the decrease being failures themselves, the decrease being nearly 21 per cent, but, compared with April a year ago, the failing off is only a fractional one, this being due mainly to the occurrence of a few large failures in New York City and Poston, none of which, however, was significant of any particular change or tendency in the general course of business. The failures in April, 1900, number 706; assets, \$2,592,567; liabilities, \$7,214,787.

\$7,214,787. CITEMENT NECESSARY.

When comparisons are made with the corresponding month in previous years, the really favorable side can be best appreciated. For instance, the liabilities in April, 1899, were only about one-half what they were in 1898, 1896 or 1895, and were less than one-fifth as large as they were in April of the panic year, 1853. An even greater proportionate decline is shown in the volume of assets, this being a feature frequently calling for attention of late.

Not Subdue the Boers-Military

"No one can tell what is going on at this very moment among the maritime and military powers of Europe. At any time there might be a surprise. They surely cannot be looking on simply as indifferent spectators of a possible difficult international problem. "The transportation of the largest army England has ever had in a single theatre of warlike operations more gle theatre of warlike operations, more than half the distance between the two poles of the earth, is in itself an two poles of the earth, is in itself an two poles of the earth, is in itself and a very different poles of the earth, is in itself and two poles of the earth, is in itself and two poles of the earth, is in itself and two poles of the earth, is in itself and two poles of the earth expensive undertaking and a very difficult one. and maintenance of such a large force in the field over 6,000 miles away from home, in a region difficult of access and with most inadequate means of transportation, is a problem to occupy mature military minds.

"Then there is the element of waste and destruction incident to an army in the field and in action. This necessitates constant replenishment, all of which by an increasing ration add to cost. As a military enterprise the end is evidently not in sight.

The military writers are blind guides, because their eyes are bandaged by the censor, and General Robert's reports are not as convincing as Caesar's commentaries. The advance northward which was begun on Monday from Krantz Kraal and Thaba, N'Chu does not appear to have been guspended, although it has not been pushed with much energy.

An official report from General Roberts dated Wednesday, shows that Central Hamilton has driven the Boers out of a strong position occupied

Although there has been no actual organization of a native party in Honolulu, everything is tending in that direction. The native mement favorable to the monarchy are the leaders in this movement. At the same time a very large number of Hawaiians who favored the republic and cast their fortunes with it are inclined to join this new movement, and will probably do so.

The central plank in the platform of this party will be to protect native interests. In other words, it will be anti-Republican, Democratic or anything glse in the field.

GREATEST CHINAMAN. Li Hung Chang's Career Has Been an

Eventful One. (New York Journal.) The recent attempt on the life of the man who has played the most important man who has played the most important part in the history of the Chinese empire during the last half century has received but scant notice in the newspapers. The news that some one had tried to poison Li Hung Chang, the erstwhile Bismarck of the east, was conveyed to us through the medium of a brief cablegram, and it fell flat upon the ears of the public. Had it occurred a few years ago the whole world would have rung with it, the diplomatic dovecotes of Europe would have been violently fluttered, and every little critic of far eastern affairs would have contributed his quota to the chorus of comment with which the announcement would have been received.

At that time the senior grand secretary

ough he had many faults, Li Hung Though he had many faults. Li Hung Chang has also many redeeming qualities. He is very fond of home life and takes a deep interest in the progress of his family. To strangers he, like all his race, is most courteous, provided they do not attempt to ram unpalatable truths down his throat. He is also extremely hospitable, and almost embarrasses the visitor by his solicitude. He is too old to institute any departure in Chinese national life, and much cannot be expected of him in his new post as minister of commerce. Many as his shortcomings have been, he has left a deep impress upon his day and generation.
